

Each year more than 80000 auto accidents occur on the roads of our country while more than 1000 people are killed and more than 9000 are injured in those accidents. Some of the road-related incidents can change one's life for ever, but even the slightest injuries might have serious consequences for those who have been injured.

We at "Djikov, Tzonkov & Partners" give the necessary individual attention to each of our clients and help them receive the fair and timely compensation due to them as provided by the law. The recovery of the way of life one had before the accident is not always a matter of money; however, a timely compensation can help this process a great deal.
